To Measure Your Windows

**First and MOST important, remember:
We will not order your windows from your measurements! The
measurements you are about to take are for pricing purposes only,
so DON'T WORRY!**

STEPS:

- 1- Don't Worry
- 2- You don't need to take 3 measurements, that's for us to do if you decide to get new windows. You can simply use measurements 2 (with the red arrows) in the image above
- 3- Measure from the inside of your home
- 4- For consistency and an accurate quote, measure and record "Width" first
- 5- DON'T measure just the glass area! Measure from the point where the window actually meets the wall, side to side (width) and top to bottom (height)
- 6- Sometimes two windows are attached to each other (see image directly below) in a single opening. In this case measure and price as 2 individual windows as outlined in red.
